Tetra NeverWet®: Helping You Handle Excess Sweat!

Hyperhidrosis is a complex word that describes a common problem: excessive sweating. Widespread and seriously unpleasant Hyperhidrosis can cause feelings of social anxiety and embarrassment that limit daily life, while persistent wetness means those affected are also more likely to develop moisture-related health complications.

Unfortunately, effective treatments can be hard to come by.

The good news? The Tetra Corporation is changing that with just one product: **NeverWet® Astringent Spray!** This professional strength solution can both eliminate excess moisture and mitigate the complications of Hyperhidrosis with a daily application. Keep reading to learn more about it.

What's In It?

Two active ingredients set **NeverWet®** apart from other options.

The first is **Witch Hazel extract**, which acts as a **powerful astringent**.

- Its **constricting** and **drying** properties help **reduce moisture**.
- It also **closes pores** and **promotes smoother skin**.

This is further complemented by **Aluminum Chloride Hexahydrate**.

- **Clinically proven** to be **safe and effective**, this ingredient allows for **quick control** of both **palmar and plantar Hyperhidrosis**.
- Speed and efficacy make **Aluminum Chloride Hexahydrate** the **standard of care** and a **first-line treatment** for **Hyperhidrosis**.

How Does it Work?

NeverWet® Astringent Spray is easy to use. When applied as directed by your physician, it works swiftly to address the root of the problem.

- Spray a light coating of **NeverWet®** on your feet daily.
- Don't wash it off for 6 hours.
- Use **NeverWet®** only as intended. Avoid using the spray near your eyes or on any irritated or broken skin near your face. **NeverWet®** isn't intended for oral use.

Are you struggling with the complications of Hyperhidrosis? With all day effectiveness and clinically proven ingredients, **NeverWet®** could be the answer you've been seeking. Like all our products, this professional strength spray is dispensed only by physicians, so get in touch with your doctor today to find out if it's right for you!
